SIGNIFICANT RISKS

Prospective Investors should ensure that they fully understand the nature of this Product and the extent of their exposure to risks and they should consider the suitability of this Product as an investment in the light of their own circumstances and financial condition. Products involve a high degree of risk, including the potential risk of expiring worthless. Potential Investors should be prepared in certain circumstances to sustain a total loss of the capital invested to purchase this Product as well as the transaction costs. Prospective Investors shall consider the following important risk factors and read the section "Risk Factors" of the Programme for details on all other risk factors to be considered.

This is a structured product involving derivative components. Investors should make sure that their advisors have verified that this Product is suitable for their portfolio taking into account the investor's financial situation, investment experience and investment objectives.

The terms and conditions of the Product may be subject to adjustments during the lifetime of the Product as set out in the Programme.

Product Specific Risks: Unless this Product provides for full repayment of capital, investors may lose some or all of their investment as well as the transaction costs as they are fully exposed to the performance of the Underlyings. The Product does not confer any claim to receive rights and/or payments of the Underlying, such as dividend payments, unless explicitly stated in the documentation governing the Product. Please refer to the Product Documentation as regards the further Product specific risk factors to be taken into account.

Issuer Risk: Investors are exposed to the credit risk of the Issuer. If the Issuer is not able to make a payment or becomes insolvent, investors could lose some or all of their investment.

Market Risk: Market risk may have a negative impact on the value of and the return on an investment in the Product. Market risk is the risk associated with the effect of changes in market factors such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term. Market risk may also lead to an early redemption of the Product (e.g. in the event of a hedging disruption).

Liquidity Risk: The Issuer or, as the case may be, the guarantor or a third party appointed by the Issuer or guarantor, if any, intends to act as market maker in relation to the Product and it will use commercially reasonable efforts to provide indicative bid and offer prices for the Product on a regular basis under normal market conditions. However, such market maker does not have an obligation to provide prices for the Product. Liquidity of the Product in the secondary market may be limited and an active trading market for the Product may not develop. Accordingly, investors may not be able to sell their Product.

Currency Risk: If the investor's reference currency is different from the currency, in which the Product is denominated, the investor bears the currency risk between the two currencies. The fluctuations in exchange rates could have an adverse effect on the value of or return on an investment in the Product, even if the redemption amount would otherwise provide for a positive return. If the Underlyings are calculated in a currency different from the Currency of the Product, the conversion into the Currency of the Product will be carried out at the relevant exchange rate.

Early Termination and Reinvestment Risk: The Product may be redeemed prior to its maturity (be it by declaration of the issuer or as a result of certain events specified in the terms of the Product) and investors must consider that in case of such an early redemption, investors will not receive any further coupon payments after the occurrence of the early redemption and the early redemption amount may be significantly below the issue / purchase price paid and the redemption amount payable at maturity. Investors may not be able to reinvest the early redemption amount in a financial instrument with the same profit potential and additional transaction costs may be incurred as a consequence of a reinvestment of the early redemption amount.

Illiquidity of Underlying: One or, if applicable, more of the Underlyings might be or become illiquid over the lifetime of the Product. Illiquidity of an Underlying might lead to larger bid/offer spreads of the Product and/or to an extended time period for buying and/or selling the Underlying respective to acquire, unwind or dispose of the hedging transaction(s) or asset(s) or to realise, recover or remit the proceeds of such hedging transaction(s) or asset(s) which might implicate a postponed redemption or delivery and/or a modified redemption amount, as reasonably determined by the Calculation Agent.

INFORMATION ABOUT TCM-COLLATERALISATION

Triparty Collateral Management Products ("**TCM Products**") are structured products with a reduced issuer risk. This protection is provided by means of a collateral pledge.

The Collateral Provider has entered into a security agreement (as amended or replaced from time to time, the "**TCM Security Agreement**") and TCM Products are collateralised in accordance with the terms of the TCM Security Agreement. The Collateral Provider will provide collateral to secure the value of TCM Products, whereby such collateral can consist among others of the securities that are the direct or indirect underlyings of TCM Products.

The legal position of the Investors and of all involved parties in relation to the collateralisation of TCM Products is determined by the provisions of the TCM Security Agreement. The Issuer shall, upon request, provide the TCM Security Agreement to the Investors free of charge. A copy of the TCM Security Agreement may be obtained from the Lead Manager at Europaallee 39, 8004 Zurich (Switzerland), or via telephone (+41 58 800 1111*), fax (+41-(0)58-8001010) or email (termsheet@leonteq.com). Please note that all calls made to numbers marked with an asterisk (*) are recorded. By calling such number, your consent to the recording is deemed given.

More detailed information regarding TCM collateralisation can also be found in the Programme.

The costs with respect to the collateralisation of TCM Products as well as the borrowing costs of the products' collateral may be taken into account for the pricing of TCM Products and may therefore be borne by the Investors, as the case may be.

The payment to the Investors in case of a so-called Realisation Event may be delayed for factual or legal reasons.

To the extent the calculation of the current value of a TCM Product, as published daily by the Collateral Provider on SIX Financial Information, proves to be incorrect, the collateralisation of the TCM Product may be insufficient.

This TCM Product does not constitute a collective investment scheme pursuant to the Federal Act on Collective Investment Schemes (CISA) and does not require authorisation or supervision by the Swiss Financial Market Supervisory Authority FINMA.
